

SUMMARY OF FUNCTIONS

Dimension Renewable Energy is seeking candidates for the Energy Storage, Project Development role. Qualified individuals will have 5 years of development or construction experience, and a minimum of 2 years in the energy industry. This position will be responsible for leading all development activities for our portfolio of stand-alone energy storage projects throughout U.S. markets. This person will report directly to the VP, Business Development & Energy Storage. Ideal candidates will have an in-depth knowledge of project management, permitting, environmental, real estate, construction and interconnection of renewable energy and energy storage assets, knowledge of the electrical transmission/distribution network and energy storage technology.

ESSENTIAL DUTIES AND RESPONSIBILITIES

- Own development activities on all energy storage projects including forecasting of installation costs
- Manage external consultants performing development and construction services
- Engage with energy storage hardware partners
- Support company strategy formulation and assessment of new market opportunities
- Liaison with Real Estate and Business Development teams to formulate new market and use case strategy creation
- Close coordination with executive management to support execution of company energy storage business plan including creation of development budgets and tracking expenditure to budget
- Travel to company offices for internal meetings
- Travel to project sites to drive development progress

QUALIFICATIONS

We are looking for highly motivated individuals who want to be part of a fast-paced and fluid company poised for growth in one of the country's most rapidly changing industries. This role requires forward-thinking, innovative approaches and comfort with complexity and uncertainty. We are looking for individuals eager to move quickly with us.

- Desire to work in an early stage company in the renewable energy field
- Bachelor's degree required and Master's degree preferred
- Ability and willingness to travel
- 5+ years of experience in renewable energy and/or construction
- Specific expertise with energy storage technology and supply chains
- Basic understanding of current energy storage use cases in U.S. markets
- Strong computational and analytical skills
- Excellent communication skills in both oral and written English
- Ability to effectively operate with high energy and flexibility in a fast-paced, constantly evolving team environment
- Self-motivated with the ability to manage diverse relationships and multiple, complex projects simultaneously
- Creativity and critical thinking skills to tackle a variety of challenges from the industry level to client specific
- Understanding of development fundamentals for renewable energy projects
- Energy project construction experience
- Proficient in MS PROJECT, EXCEL, WORD and POWERPOINT

PHYSICAL DEMANDS

Though Dimension believes in long term work/life balance, we also believe in short term imbalances. Long hours will be needed from time to time as dictated by deal flow and project deadlines.

LOCATION

- Denver
- New York City
- San Francisco
- Atlanta

This role will involve travel approximately 50% of the time.

Benefits

We offer competitive compensation and a generous benefits package.
